

## Supervisor Meeting 3

Supervisor: Simon Perkins

Date: 18/05/21

Length: 1 hour 30 minutes

Contents:

This was the last supervisor meeting I had for the project. In this meeting we discussed in detail the research question and methodological approach for my project.

This meeting helped as my project had developed and evolved from my initial research question. Leaving me with a project that did not have a question. We went through my work and discussed my methodological approach towards my production. We reviewed and changed my methodology to that of a bricolage approach.

Simon reviewed my ground work, leaving annotations of what could be improved. This last meeting was really about refining my project. Making sure everything was right before submitting.
